Old Business: None

Code Question: Jim Dimit inquired about sleeve requirement for pipes passing thru concrete. Several practices were suggested including triple wrapping with foam and link seal.

Discussion regarding rain water harvesting and what to do with it once collected
"You catch it , you keep it" was the answer

New Business: Womans Building California Conference will be held on May 15&16, in Sacramento.

Flow Expo trade show will be held in Long Beach May 1, 2010.

June meeting will be IAMPO seminar on chapter 16 of the 2009 UPC, price is \$60

Penny Feehan will be the speaker.

Correspondence: None

Featured Speaker: Don Kirkland of Jensen Precast

Jensen now designs and builds pump lift stations

Complete package that will be custom designed and built to the clients requirements, can be square, round or rectangular. Round has no depth requirements.

Hatch size and design should be considered due to location of installation (includes structural material, and depth of pump station-deeper requires a larger hatch)

Environment with in pump station can be corrosive and therefore hatch will have to withstand effects.

Interior can be coated with various products.

Contractor can core thru side of casing, use non-shrink grout to patch penetration.

Available options that can be provided:

Control panel, pumps, winch, hatch guards/covers, plastic or steel piping, pump manufacturer's, valving, float mechanisms, style of pumps, etc.

IAPMO donated several prizes for the meeting. Meeting adjourned at 9:59 am.
